Work with the Command Center Queue

How Do I...?	Selections	Tips & Guidelines
<p>Select a Child Intake from the Command Center Queue</p>	<ul style="list-style-type: none"> • From Desktop, click Utilities, and then select Command Center Queue. • Select check box next to Intake. • Click Save. • Intake number becomes a hyperlink and an asterisk displays instead of check box. • Click Intake Number hyperlink. • Intake page displays. 	<p><i>The Command Center Queue displays all Intakes received through the Avaya system and interfaced to FSFN.</i></p> <p><i>The queue filters by Program Type, Recommended Screening Decision, and Final Decision.</i></p> <p><i>The Intake Number, Intake Name, and Date/Time Received sort ascending and descending.</i></p> <p><i>The queue can remain open until the Counselor selects Close.</i></p> <p><i>The Save button is disabled until the Counselor selects the check box.</i></p> <p><i>The queue refreshes by clicking Refresh if the Counselor has been away from the page for a length of time.</i></p> <p><i>A Counselor can check out only one (1) Intake at a time.</i></p> <p><i>Before the Intake is checked out, the Status is Unassigned. When the Counselor selects and saves the Intake, the status changes to Checked Out.</i></p> <p><i>If the Counselor assigns the Intake to the CPI and does not have the opportunity to complete the background checks, they can release the Intake back to the queue. These Intakes have the status of Released.</i></p> <p><i>Only the Counselor and the Supervisor see the hyperlink for the Intake that they checked out; for all other users, the Intake is view-only.</i></p>
<p>Release a Child Intake back to the Command Center Queue</p>	<ul style="list-style-type: none"> • Check out Intake. • Link Intake to case. • Complete Assignment. • Release button becomes enabled. • Click Release. • Intake releases back to Command Center Queue for processing. 	<p><i>The assignment can be either the CPI or the Receiving Unit when the Release button becomes enabled.</i></p> <p><i>The Released Intakes are only for the Intakes that have Background Checks set to "Yes".</i></p> <p><i>Released Intakes have the status of Released and not checked out. This indicates to the Command Center that the Background checks are complete for this Intake.</i></p>

Work with the Command Center Queue

How Do I...?	Selections	Tips & Guidelines
<p>Update Intake Information group box – Child</p>	<ul style="list-style-type: none"> • Date/Time Intake Received field pre-fills from Interface. • County and Secondary County pre-fills from Interface. • From R/T drop down, select appropriate Response Time if not pre-filled from Interface. • Background Check Required pre-fills from Interface. 	<p><i>The County pre-fills from the Interface and is modifiable.</i></p> <p><i>If the Background Check Required is “Yes”, then the background checks are required.</i></p> <p><i>For Supplemental Intakes, the Background Check Required defaults to “No” and the reason defaults to “Supplemental”.</i></p> <p><i>If a Background Check is not required, the user can select No and select a reason why it is not needed.</i></p>

Work with the Command Center Queue

How Do I...?	Selections	Tips & Guidelines
<p>Update Participants tab – Child</p>	<ul style="list-style-type: none"> • All Participants pre-fill from Interface. • All Reporter Information pre-fills from Interface. 	<p><i>The Participants tab consists of two (2) group boxes. The boxes are Intake Participants and Reporter.</i></p> <p><i>All information received through the Avaya system pre-fills the appropriate fields on the FSFN Intake page.</i></p> <p><i>The Reporter Information expando is only accessible to those with the appropriate security.</i></p> <p><i>The Reporter Information narrative field captures the Reporter Address.</i></p> <p><i>Once enabled, the fields are modifiable. Participants can be added to the Intake. See steps for creating a child Intake in FSFN.</i></p> <p><i>If the child has three (3) prior screened out Intakes within a two-year period, a hyperlink displays next to the child's name. If this Intake is screened out, then the 3-Hits Reviewed check box needs to be selected. If the Intake is screened in then the check box does not need to be selected and all screen out Intakes for this child resets to zero (0). The next time an Intake comes in for this child and is screened out the count restarts for the 3-Hits within the two-year period.</i></p> <p><i>If any demographic changes are made on CRM in the participant detail narrative, then the CRM Demographic Changes are available in the Options drop down. This page stays open so the Command Center Counselor can update the person management for this participant. Once finished, the Counselor must click Close to close the page.</i></p> <p><i>If Duplicates are selected in CRM, the Duplicate column displays Yes next to the participant. The Counselor needs to search in FSFN and correct the duplicate by performing a merge.</i></p>

Process a Child Intake selected from the Command Center Queue

How Do I...?	Selections	Tips & Guidelines
<p>Participants tab – Child</p>		<p><i>If the question on CRM for the Adult having access to the child within the next 24 hours is selected, the 24 Access column displays Yes next to the Adult.</i></p>
<p>Relationship tab – Child</p>	<ul style="list-style-type: none"> • Click Relationship tab. • All Relationships pre-fill from Interface. 	<p><i>All Relationships map from the Interface. These fields are modifiable.</i></p> <p><i>The Relationship tab establishes the relationships between the subjects in the Intake.</i></p> <p><i>For Child Intakes, the page pre-fills with the appropriate number of rows based on the number of adults and children identified on the Participants tab of the Intake page.</i></p> <p><i>Users are required, at a minimum, to complete the relationships between the various adults and children in the Intake, which are pre-filled based on the participants' ages. Clicking Insert allows the user to insert additional relationships amongst the adults and children.</i></p> <p><i>The intake types dynamically drive the relationship values and are editable until the intake is frozen.</i></p>

Process a Child Intake selected from the Command Center Queue

Click Go. 	<p>The Prior Intakes and Service Records template launches with the completed information regarding the intake and is not editable.</p>

Create a Split Intake

How Do I...?	Selections	Tips & Guidelines
Create a Split Intake	<ul style="list-style-type: none"> Select Split Intake from the Options drop down of an existing Intake. Click Go. The Split Intake pop-up page displays. The check boxes for all intake participants are pre-selected. Click Continue. The FSFN Intake page displays. Click Save. Click Close. 	<p>The Split Intake option is available from all Intake sequences: initial, additional and supplemental.</p> <p>All information from the originating intake copies over to the new 'split' intake on creation of the new 'split' intake. For participant specific information, such as roles, the information from the originating intake copies to the new 'split' intake for those selected participants on the Split Intake pop-up page.</p> <p>The new 'split' intake goes through the standard Receiving Unit processing.</p>

Delink an Intake

How Do I...?	Selections	Tips & Guidelines
<p>Delink an Intake</p>	<ul style="list-style-type: none"> • Select Delink Intake from the Options drop down list on the Maintain Case page. • Click Go. • The Delink Intake page displays. • Click the radio button for the appropriate intake to delink from the Case. • Click Save. • A validation message displays confirming the selected delink. • Click Yes. • Click Close. • The Maintain Case page displays. • Click Close. 	<p><i>If a Service Referral or an Initial Intake links to the wrong Case, or if the Intake needs removal from the Case in order to break the relationship between the Service Referral or Intake and the Case, a user with the appropriate security can delink the intake from the case. If the investigation passes the creation of a commencement note, the use cannot delink the Intake from the case if the investigation has not gone past the creation of a commencement note.</i></p> <p><i>Following the delinking of an intake from a case, the Case remains on the desktop within the Cases expando, but the Intake is moved to the Intakes expando, of the user's desktop that performed the delink process.</i></p>

Perform an Intake Merge

How Do I...?	Selections	Tips & Guidelines
<p>Perform an Intake Merge</p>	<ul style="list-style-type: none"> • Select Re-link from the Options drop down on the Intake page. • Click Go. • The Re-link Intake pop-up page displays. • Click the Search hyperlink to launch the Case Search page. • Perform a Case Search. • Click the appropriate Case Folder. • Click the Intakes icon and select the radio button for the Initial Intake, for which the existing intake should be a sequence to. • Select the appropriate radio button, indicating if the intake should be an Additional or Supplemental Intake. • Click Save. • Click Close. • The Intake page displays and the Intake Number, in the Intake Information group box displays the appropriate sequential number, as well as the appropriate sequence type of additional or supplemental. • Click Save. 	<p><i>Upon employing the Merge Intake process, all information documented on the FSFN Intake page remains the same, except for the following:</i></p> <p><i>The Intake Number is no longer a 01 initial intake, but displays the appropriate numbering sequence for the selected initial intake on the Case Search page.</i></p> <p><i>The Intake Type displays the selected sequence type of additional or supplemental.</i></p> <p><i>The Allegations tab automatically updates to display both the 'Previous Allegations' and 'Allegations' group boxes in order to pull in all previous allegations, as the intake is now a sequence. All new allegations, documented on the current intake, are displayed in the 'Allegations' group box.</i></p> <p><i>The system checks to determine if the intake already went through the CI Unit and/ or Receiving Unit processing, prior to delinking and re-linking. If the intake already went through the CI Unit and/ or Receiving Unit, the Hotline Supervisor or Authorized User, who performed the Merge Intake process, must manually assign the Intake to the appropriate Protective Investigator. If the intake has not already gone through the CI Unit and/ or Receiving Unit, the intake follows the standard process.</i></p> <p><i>A Merged Intake indicator displays in the Intake Information group box.</i></p>

Access the Receiving Unit List

How Do I...?	Selections	Tips & Guidelines
<p>Access the Receiving Unit List</p>	<ul style="list-style-type: none"> • From the Menu bar, click Utilities. • From the drop down list, select Receiving Unit List. • From the subsequent list, select Adult Intakes. • The Receiving Unit List page displays. • Select the appropriate county from the County drop down field to display all unassigned Intakes for that County's Receiving Unit. • Click the check box next to the appropriate Intake. • Click the Search hyperlink. • Enter Search Criteria in the Last Name field. • Click Search. • In the Workers Returned field, select the appropriate radio button for the appropriate Worker. • Click Continue. • The Receiving Unit List page displays. • Click Assign. • Click Close. 	<p><i>The system separates the Child and Adult program types and displays them individually. Appropriate workers in the field view the 24-hour response Intakes assigned to their County by the Hotline using the Child and Adult Intakes options.</i></p> <p><i>If the worker accessing the Receiving Unit List page does not wish to assign the Intake to a specific worker, he/ she can accept the intake, thereby creating a self-assignment, by selecting the appropriate Intake check box, and clicking Accept.</i></p>
