Child Protection Services
Quality Management Plan
Fiscal Year 2015-2016

Serving Escambia, Santa Rosa, Okaloosa, and Walton Counties through contract with the Florida Department of Children & Families.

Completed by: Carlita Walker, Quality Management Manager
Plan Approved by: Margaret Taylor, Director of Program & Quality
1221 W. Lakeview Avenue, Bldg. B
Pensacola, FL 32501
Phone: (850) 525-2503
1.0 Introduction

The FamiliesFirst Network (FFN) Quality Plan is completed by the Quality Management Manager and approved by the Director of Program & Quality. The plan is reviewed, amended and approved a minimum of annually. The plan is amended more frequently when substantial change necessitates update. Upon internal approval, the plan is forwarded to the Department of Children and Families (DCF) Contract Manager, DCF Office of Child Welfare, and to Lakeview Center Incorporated’s (LCI’s) Director of Quality Management & Improvement.

The scope of this plan is FFN, the Child Protection Services Division of Lakeview Center, Inc. FFN’s geographical service area includes Escambia, Santa Rosa, Okaloosa, and Walton Counties in the State of Florida. Child Protection Services provided by FFN include case management for out-of-home placements, including adoption; in-home supervision; foster home recruitment and licensing; child placement; revenue maximization; independent living services for youth under 18 and Young Adult Services for youth over 18. The agency does not sub-contract case management services to external partners.

FFN sub-contracts for prevention/diversion, family preservation/reunification, adoption support, additional foster home resources, residential group care and other related system of care service needs.

At a divisional level, the FFN Executive Leadership Team meets weekly and discusses performance on an ongoing basis. The FFN Executive Leadership Team is comprised of the President of Families First Network, and Directors of Resource Development, Program & Policy, Family Services, and Community Relations.

FFN’s quality plan recognizes and includes LCI’s Corporate Plan for Quality while specifically detailing FFN’s Quality Management System. The FFN Quality Management System includes accountability for and Continuous Quality Improvement (CQI) of key components as required by LCI, the Commission on Accreditation of Rehabilitation Facilities (CARF) International, DCF contract, and needs specific to the child protection services division. These key components are:

- Customer Satisfaction
- Deployment and sustainability of accreditation standards and performance excellence criteria
- Development and monitoring of division specific performance and scorecard measures and outcomes as defined by the Department of Children and Families
• Division education on the Performance Accountability Report (PAR) measurements and action plans
• Employee knowledge and skills training
• Implementation of best practices

Continuous Quality Improvement focuses on identifying trends and best practices, and providing internal oversight, consultation, and coordination related to the areas listed above.

2.0 Description of QA/CQI

2.1 Staff Resources

Quality Management is a subcomponent of the FFN Program & Policy Unit. FFN has four positions primarily devoted to Quality Management. These positions include:

- A Quality Management Manager (QMM) who reports to the Director of Program & Policy.

- Three (3) Quality Management Specialists who report to the Quality Management Manager. These positions are designated to conduct quality reviews required by DCF contract as well as internal quality reviews. Specialists in these positions receive specialized training as required by DCF contract.

Additionally, specialists are involved in quarterly data analysis and quality improvement efforts. The DCF Contract Manager is invited to the agencies quality improvement meetings each quarter.

The agency employs a Performance Improvement Manager (PIM). This position is devoted to Continuous Quality Improvement and is supervised by the Director of Resource Development.
2.2 Infrastructure

FFN has responsibility for the division level implementation of a quality management system consistent with the LCI Corporate Quality Plan. This function is the responsibility of the FFN Performance Improvement Council (PIC) and is structured as indicated in the chart below:

**FFN Executive Leadership Team**

*Members*: FFN President and Directors

*Purpose*: Approve resources and policy changes needed to implement plans of the council to ensure quality service.

---

**FFN Performance Improvement Council**

*Council members*: PIM, QMM, Family Services Liaison, Team Managers, Client Relations and one representative from each of the Service Center Quality Circles

*Purpose*: Review system data to identify areas where improvement is needed and to prioritize efforts. Responsible for monitoring actions to ensure quality services meet or exceed Federal measures, CARF standards, CFSR requirements, and QA & QI action plans.

*Reporting*: Progress and recommendations for policy and procedural changes presented to FFN Executive Leadership Team by written summary. Reporting to LCI Quality Council as needed.

---

**Quality Circle Members**: Should include the unit supervisors and QM rep, but may vary to include others.

*Purpose*: Review of Service Center data to identify areas for improvement, prioritize local actions, implement action plans, and review progress to ensure consistent compliance with all policy and procedures.

*Reporting*: Monthly progress with implementation including successes and barriers to achievement should be presented to the FFN Performance Improvement Council (PIC).
FFN developed the above division specific quality design to address the items most important to child protection practices. The collaboration of all FFN programs in the quality design provides the Quality Management structure necessary to:

- Facilitate continuous improvement in the provision of care and services
- Develop a customer focused, user-friendly approach in the provision of services
- Ensure compliance with policies, procedures, laws, state and federal rules, and accepted standards of practice
- Improve processes and systems relative to both internal and external customers

This design incorporates quality assurance, continuous quality improvement, and risk management principles. The FFN Executive Leadership Team provides oversight in the process by reviewing recommendations of the Performance Improvement Council (PIC) and providing feedback. Additionally, the Performance Improvement Council regularly reports to the DCF/FFN Steering Committee to provide an added layer of accountability.

3.0 Data Collection

Data is collected in the most efficient manner possible to identify trends and patterns, and to monitor specific measures of quality and satisfaction established within the current strategic plan which includes performance measurements established by LCI, DCF, and CARF. Automated systems for data collection are utilized where possible to allow for data correlation and graphic representation of patterns and trends. Through the strategic planning process, measures of quality and satisfaction are established and monitored on a routine basis through the Performance Accountability Report (PAR). FFN relies primarily on aggregate data and listing reports located in FSFN and the DCF Web Portal to gauge performance on contract and scorecard measures.

4.0 Data Analysis

Reports from available sources are reviewed daily, monthly or quarterly based on the necessity for tracking performance on each measure. Where available, data reviewed includes trended figures/rates, benchmark comparisons with other agencies or regions and recognized standards. The Performance Improvement Manager is primarily responsible for performance measure tracking.
The FFN Quality Management Manager analyzes and trends quality management case file review data. This information is provided to the FFN Executive Leadership Team, Performance Improvement Manager, Team Managers and Unit Managers. An Annual Summary is completed and submitted to the aforementioned and to DCF per contract requirements.

5.0 Performance Improvement Action Plans

When results of quality management activities reflect a process or outcome that is not within desirable range, action is taken to identify improvement opportunities through a thorough root cause analysis. Action Plans are developed to drive improvement. These plans are developed utilizing a team approach with staff members identified as key players in effecting and sustaining change relative to the performance concern. Action Plans developed to drive division-wide change are approved by the FFN Executive Leadership Team. Action Plans include, at a minimum, the following information: identified issue, proposed plan for corrective action, responsible parties for the corrective action, and the time frame for completion. This is applicable for both internal and external monitoring initiatives.

6.0 Decision Making

Decision making is based on the review of data and the thorough investigation of undesirable events, trends, or patterns. Individuals, teams, and/or the Performance Improvement Council assigned to address areas of concern are provided with the resources needed to collect and analyze available data and make informed decisions. Decision making at FFN is delegated to the extent practical to the individual, team, or council responsible for a particular improvement or monitoring initiative.

7.0 Policies and Procedures

FFN is responsible for development and update of procedures specific to the Child Protection Services Division. These procedures are updated a minimum of once per year and more often as needed. Major changes to FFN procedures require the approval of the FFN Executive Leadership Team, the Department of Children and Families, and potentially the LCI Management Advisory Council and the Lakeview Center Board of Directors.

8.0 Confidentiality of Information

Verbal and written communications and documents obtained through or resulting from the various quality processes (i.e., peer review, quality reviews, incident reporting, critical event review, etc.) which reflect upon individual clients or staff are processed and maintained as "privileged" materials, protected by state law. Individuals are not identified in final reports used for dissemination or corrective action purposes. When identification is required, client numbers or employee titles are used.
9.0 Quality Program Evaluation

The accomplishments of Strategic Plan Goals (priorities for improvement) are reviewed regularly through the Performance Accountability Report. Each FFN program reviews the effectiveness of their monitoring and evaluation processes as well as their efforts toward the continuous improvement of service delivery. Additionally, the objectives, scope, and organization of the FFN quality plan are reviewed for effectiveness and efficiency and to promote continuous learning across the organization.

Reporting of data is made available on the Lakeview Center, Inc., Performance and Accountability Report (PAR). This information is communicated at monthly Board meetings, Quarterly Community Alliance meetings, DCF/FFN Steering Committee meetings, DCF Circuit Review meetings, and Lakeview Business Plan meetings. Additionally, the Lakeview Center, Inc. Annual Report is sent to all staff, stakeholders, board members, and community members.

10.0 Training

In addition to training required by LCI, position specific training is required for some FFN employees. Family Services Counselors (FSC’s) and Unit Managers are required to be trained and certified according to the Florida Certification Board criteria. Training is tracked in an electronic system known as iDevelop.

The FFN Training Department provides ongoing training opportunities for staff at all levels. A bi-monthly calendar of training is provided to all FFN staff on a monthly basis. Abundant training opportunities to earn CEU’s are offered to certified staff or staff seeking certification. Some examples of these training opportunities include Motivational Interviewing, Human Trafficking, and Safety Planning.

FFN continues to devote a segment on supervisory discussion, including consultation in the safety methodology, into the Supervising for Excellence (SFE) training. FFN makes this training available to supervisors for the GAL, DCF or providers. This training is required for all new FFN supervisors. It is also open to STAR Mentors.

A Certification Support Team approach is in place for new Family Services Counselor (FSC’s) proceeding through the Florida Certification Process. The Certification Support Team looks at ways to:

- Support trainees in the new certification process utilizing a team approach (Unit Manager, FFN Trainer, University of West Florida Trainer, and Quality Management Specialist)
- Identify training needs
- Measure transfer of learning
This process includes an initial meeting with FSC’s completing pre-service training/post-testing as well as six-month meetings. A Toolkit guides FSCs and supervisors in necessary requirements.

The FFN Training Department provides some training support activities for FSC’s who are in Pre-Service training for additional support of learning FSFN. Three Houses, Teaming and Web-Based links add to the array of trainings provided. The annual FFN In-Service Training Conference is planned for May 2016.

The FFN Training Manager participated in the Florida Safety Decision-Making Methodology (FSDMM) Super Safety Practice Expert training and development and was deemed proficient in training and consultation of the methodology as a Super Safety Practice Expert (SSPE). This expertise allows the FFN Training Manager to deem other leaders proficient to train and consult the model.

Implementation of Concurrent Planning Training will continue and has been added as a required course for all new FSC’s. A pre and post training survey is administered as part of the UWF evaluation process for these training classes.

Implementation of the Safety Methodology has been a focus of support and will continue into 2016. A 3 day Refresher/Reconnect Training has been developed and is being deployed in all areas and includes FFN, DCF and CLS staff. This training incorporates the Practice Guidelines as well. It will be provided to all staff by the end of December, 2015. Additional areas of support will be identified and Learning Groups provided to support continued practice development.

Development of Safety Practice Experts in the Safe and Together Model will continue with quarterly meetings and an annual retreat. Best practice is a consult on all DV cases to focus on the core elements of partnering with the survivor and holding the batterer accountable.

A new area identified for the coming year is development of Practice Experts in Sexual Abuse. Training with Dr. Eddleman will be provided to all staff and providers. Additional training will be provided to develop the Practice Experts in each service center.

Quality Contacts is another area attention is being given and will be incorporated into training already being provided. Improvement in the area of Quality Contacts is one of FFN’s 2016 Strategic Goals.

Permanency Values and Skills training has been and will continue to be provided to all staff and providers for the Casey Permanency Roundtable project.

In additional training on working with fathers is also being scheduled.

FFN Training staffs are also certified in CPR/First Aid and provide for staff and families needing it.
11.0 Risk Management

Consistent with Lakeview Center, FFN collects critical incidents, complaints, and grievances data to monitor and improve the system of care. Critical incidents, complaints, and grievances are reported to the Risk Management program of Lakeview Center. Each critical incident, complaint, or grievance is reviewed and reported to external agencies according to requirements. When indicated, the FFN Executive Leadership Team reviews risk management areas and determine next steps. The Client Relations Specialist provides a quarterly report and analysis to the LCI Risk Management Team. The LCI Risk Management Team utilizes the information to identify opportunities to reduce adverse events. Critical incidents, complaints, and grievances are also reviewed by the LCI Safety Team, as appropriate.

Information from the processes stated above will be used to provide recommendations for:

- Modifications to the environment to promote safety and facilitate services
- Modifications to the service planning process to improve the outcome of care;
- Education and training for clients and their families and/or organization staff;
- Service policy/procedure modification;

12.0 Risk and Critical Incidents

Risk and critical incidents include the occurrence of an event that either results in the death or serious injury of a person served by the agency. These events require a thorough and credible root cause analysis. Such events are reported to and tracked by FFN Administration and ultimately to LCI Risk Management and DCF through incident reporting systems. Risk and critical incidents extend to subcontractor providers and facilities.

12.1 Process for Reporting of Risk and Critical Incidents

Any occurrence of a risk or critical incident within FFN requires immediate notification of the Unit Manager, Team Manger, the program President, FFN Client Relations Specialist, and the Lakeview Center Risk Manager as soon as the situation is under control, but no later than 24 hours of the discovery of the event. A formal report will be filed in the STARS Incident Reporting System.

12.2 Investigations of Risk and Critical Incidents (Root Cause Analysis)

The Policy and Permanency Manager within FFN Administration serves as the FFN Death Review Coordinator and is responsible for an in-depth review and analysis of any child death occurring on an open case. This
review and analysis is followed by debrief within the LCI and FFN risk management structure. The following are invited to the debrief scheduled by the Death Review Coordinator: President of Child Protective Services; FFN Directors of Family Services, Program & Policy, and Community Relations; LCI Director of Risk Management; Quality Management Manager; an LCI Risk Management Specialist; all staff directly involved with the event through direct service or supervision, legal counsel, and others as needed.

The debrief committee identifies contributing factors which are be prioritized for improvement and assigned to the appropriate team or individual to address. Improvement initiatives are designed to reduce the risk of future occurrences of the event. The committee designates a responsible person or oversight body that monitors to ensure all new or updated procedures are in place and that any recommended action taken has the desired impact on client care and safety.

All other incidents including serious injury, sexual assault, or events occurring which could have resulted in the death, serious injury, or sexual assault of a child served are addressed through data collection and incident reporting review. Reports and Analyses are reviewed and reported according to requirements.

13.0 Planned QA Quarterly Activities & Review Schedule

The following Quality and Compliance Reviews mandated by DCF Contract and outlined in the DCF Windows Into Practice will be completed quarterly in the DCF or Federal Web Portal using standardized electronic tools:

1. Ten (10) Rapid Safety Feedback (RSF) Reviews completed in the DCF Web Portal focusing on children under the age of four served in-home. FFN will complete additional RSF reviews each quarter. These additional reviews are not required by contract. The number of additional reviews may fluctuate; however, the goal is to complete a minimum of twelve (12) additional reviews per quarter.

2. Eighteen (18) Florida Child and Family Services Reviews (CFSR’s) completed utilizing the CFSR tool. These reviews will be a file review. Reviews will be completed in Federal Web Portal.

3. Two (2) Florida CFSR In-depth reviews completed in the Federal Web Portal utilizing the CFSR tool. These reviews will include file review plus interviews with case participants and providers.

4. Seven (7) State Conducted CFSR’s completed in the Federal Web Portal during the CFSR period beginning April 2016 and ending September 30, 2015. These reviews represent 7 of 120 reviews to be completed statewide.
DCF will provide the sample for these reviews. FFN’s portion of the sample will include five out-of-home and two in-home cases.

Standard monitoring tools are used throughout the division to monitor quality and compliance. Standardized monitoring tools provide valid and reliable measures that cover policy and program requirements and take into account changes to state statutes, federal regulations, and accreditation standards.

FFN Programs included in the review activities of this section are Family Services (FFN’s case management component), Adoptions, and Independent Living. For FY15-16, RSF and CFSR reviews will be completed by FFN service area according to the following review schedule:

<table>
<thead>
<tr>
<th>Service Area</th>
<th>Quarter</th>
</tr>
</thead>
<tbody>
<tr>
<td>Escambia</td>
<td>Quarter 1</td>
</tr>
<tr>
<td>Santa Rosa</td>
<td>Quarter 2</td>
</tr>
<tr>
<td>South Okaloosa</td>
<td>Quarter 3</td>
</tr>
<tr>
<td>North Okaloosa &amp; Walton</td>
<td>Quarter 4</td>
</tr>
</tbody>
</table>

The purpose of this schedule is to review a larger sampling of cases per service area during one quarter each year rather than a smaller sample of cases from each service area on a quarterly basis throughout the year. The plan allows for the service area review to be followed by three quarters of quality improvement efforts.

Following review, a feedback meeting is held to share the results of each review with the Unit Manager and Family Services Counselor responsible for the case. Team Managers are also invited and encouraged to participate.

At the conclusion of each quarter, the data is provided to the FFN Executive Leadership Team, Performance Improvement Manager, Team Managers, Unit Managers, and the DCF Contract Manager. A Service Area Next Steps Meeting is held to analyze results and to develop a Performance Improvement Action Plan using a team approach to include stakeholders. During the Service Area Next Steps Meeting, systemic concerns are identified to address both internally and externally with stakeholders.

Timely QM data input occurs through oversight by the Quality Management Manager. Oversight includes frequent progress checks to ensure reviews are being completed at an acceptable pace throughout the quarter.

The goal is for RSF and CFSR input to be completed by the last day of each quarter. This allows time for the Quality Management Manager to validate reviews and to ensure any needed corrections are made within required DCF timeframes.
Reviews completed for the State Conducted CFSR will be completed from a sample provided by DCF and according to the following tentative schedule:

<table>
<thead>
<tr>
<th>Dates of Review</th>
<th>Type of Case</th>
</tr>
</thead>
<tbody>
<tr>
<td>April 11-13, 2016</td>
<td>Out-of-Home</td>
</tr>
<tr>
<td>May 9-11, 2016</td>
<td>Out-of-Home</td>
</tr>
<tr>
<td>May 16-18, 2016</td>
<td>In-Home</td>
</tr>
<tr>
<td>June 6-8, 2016</td>
<td>Out-of-Home</td>
</tr>
<tr>
<td>July 11-13, 2016</td>
<td>In-Home</td>
</tr>
<tr>
<td>August 8-10, 2016</td>
<td>Out-of-Home</td>
</tr>
<tr>
<td>September 12-14, 2016</td>
<td>Out-of-Home</td>
</tr>
</tbody>
</table>

14.0 Special, Discretionary, and Systemic Factor Reviews

Special and Discretionary Reviews are completed at the request of members of the FFN Executive Leadership Team, DCF, Team Managers, and Unit Managers. Reviews also occur when a need is identified by the Performance Improvement Council. Review findings are analyzed and utilized toward Continuous Quality Improvement. On an ongoing basis, FFN participates in Internal Quality Surveys in preparation for CARF accreditation surveys. Annually, FFN completes a Revenue Maximization Review of Adoption TANF, Title IV-E Foster Care, and Title IV-E Adoption eligible children. As requested by DCF, FFN will participate in stakeholder interviews for further review and assessment of Systemic Factors.

15.0 External Monitoring

FFN is subject to monitoring by various external parties. These reviews include:

- A validation of the findings of FFN internal monitoring activities by DCF (State) or ACF (Federal)
- Contract monitoring
- Independent audits
- Foster Home and Child Placing Agency Licensure
- Accreditation

External monitoring is a valuable tool for Lakeview Center and FFN. Reviewers are seen as consultants in that they often bring knowledge of national trends and
practices that would improve services. Adverse findings from monitoring visits or validation processes are addressed through FFN’s Performance Improvement Action Plan process.

16.0 Revenue Maximization

Revenue Maximization audits primarily consist of TANF, Master Trust, and Adoption Subsidy audits. The DCF Contract Oversight Unit (COU) completes an annual review. Every two years, the Social Security Administration completes a Master Trust Review.

The Revenue Maximization Unit reviews a DCF monthly report regarding TANF eligibility and tracks each child on the report weekly until a TANF eligibility decision is made.

The Revenue Maximization Unit in collaboration with the FFN Quality Management Team has developed an annual file review which samples each type of funding to include IV-E Foster Care, IV-E Adoption Assistance, and TANF Adoption Subsidy. All of the cases shall be drawn from FSFN identifying cases based on their eligibility code. The FFN Quality Management Team shall compile and submit a monitoring summary report thirty (30) days following the review to the Circuit 1 Contract Manager. The summary will include findings and recommendations for improvements. In addition to this annual review, a Policy and Quality staff member reviews 100% of all children potentially IV-E eligible for Adoption Subsidy.

17.0 Foster Home Development

Foster Home Licenses are issued by the Department of Children and Families through an attestation process. Monthly random audits are conducted by DCF to ensure that all initial and relicensing packets are in compliance. DCF provides an annual score as to how FFN has performed in providing required information in licensing packets. FFN has historically scored 98% or above in these audits.

18.0 Accreditation Internal Site Visits

Site Visit teams, comprised of employees across Lakeview’s divisions, conduct internal quality surveys twice per year for the evaluation of quality, particularly as related to accreditation. Standardized assessment tools are used at program sites to ensure a fair and consistent review process. The goal of the Site Visit Teams will be to identify opportunities for improving the environment, continuity of care, on-going assessment and planning, customer input and alignment with accreditation standards. The review data will be rolled up, analyzed and reviewed for trends, and used to develop action plans to drive improvement.
19.0 Customer Satisfaction

As part of Lakeview Center’s customer satisfaction efforts, satisfaction surveys are conducted with a representative sample of active FFN customers. Targeted audiences include clients and their families, and caregivers. Results of customer and staff surveys will be reviewed and action will be taken to improve low scoring items and to conduct necessary service recovery. Over time, the survey results will be aggregated and trended for the evaluation of performance and system of care effectiveness.

There are several vehicles for customers and staff to suggest areas for improving customer care, the efficiency of the division, and safety of the environment. These vehicles include: Bright Ideas program for staff, client satisfaction surveys, staff satisfaction surveys, interdepartmental satisfaction surveys, and direct feedback to division or organizational leadership.

20.0 Sub-Contract Oversight

FFN sub-contracts for prevention/diversion, family preservation/reunification, adoption support, foster home development, residential group care and other related system of care service needs.

The performance of subcontracted providers is monitored utilizing two principal methods. Sub-providers submit monthly and quarterly reports outlining their performance in relation to outcomes set forth in their contracts. Reports are used to crosswalk effectiveness of service delivery with improvement in the lives of the children and families served, or as deliverables related to contract goals in the case of non client services. Additionally, periodic on site monitoring of contracts is conducted at a frequency based on risk assessment. On site monitoring includes an evaluation of environment of care, case review, financial and administrative review, quality, and personnel. Contract monitoring encompasses administrative and programmatic expectations to be met by Lakeview’s network. Providers are monitored based on DCF’s Community Based Care Lead Agency subcontracting guidelines, Lakeview Center Inc. standard contract, performance contract, and all attachments, Florida Statues (F.S.), Florida Administrative Code (F.A.C), Federal regulations and Department of Children and Families policy, if applicable.

The quality and adequacy of services delivered by each contract provider is monitored through review of records, interviews of clients and staff, and observations during site visits. The provider is also required to complete an annual self evaluation. The contract monitoring team maintains all provider performance reports and validates information reported by the provider.

Information regarding contract providers is communicated through monthly Board meetings, Community Alliance Meetings, FamiliesFirst Review meetings and Lakeview Business Plan meetings. All executed subcontracts, subcontracting monitoring reports, and corrective action plans are provided to the Department of Children and Families Contract Manager.
